

Harness the power of the sun with Alpha Qualität hat einen Namen oku Obermaier GmbH

Increase the use of your pool by up to six months using the free energy of the sun.

Swimming pools are a great source of exercise and entertainment. Unfortunately, most pools are used for less than two months of the year because they are too cold.

Solar pool heating is the most energy and cost effective way of heating a pool.

Our Alpha Oku solar pool heating is an extremely reliable, high performance product, which is capable of increasing your water temperature by approximately 10°C, ensuring you, your family and pool friendly neighbours get maximum fun, value and exercise out of that big watery investment in the backyard. The systems are low maintenance and very easy to operate.

Its hard to beat **German technology** when its at it's best
